

GB Installation Guide (English)

1. Database Foundation (NAS / Web Host)

- **1.1 Create Database:** Create an empty database (e.g., tCash_db) via your control panel or MariaDB package.
- **1.2 User & Access:** Create a database user and assign **ALL PRIVILEGES**.
 - *NAS Tip:* Check if your MariaDB is running on port 3306 or 3307.
- **1.3 Import Structure:** Use phpMyAdmin to import your .sql file to initialize tables.

2. Preparing the Program Folder (tCash)

- **2.1 Upload:** Transfer the tCash folder to your server.
- **2.2 Directory Verification:** Ensure /uploads, /backups, /json-data, and /temp_restore exist.
- **2.3 NAS Permissions (File Station):**
 - Right-click folders in File Station → Properties → Permissions.
 - Grant the http user (or group) read/write access.

3. Connection Configuration (inc-folder)

- **3.1 Editing:** Open inc/db_connect.doc.php and enter your DB credentials.
- **3.2 Activation:** Rename the file to inc/db_connect.inc.php.
- **3.3 Security:** Rename inc/.htaccess to inc/.htaccess.

4. System Diagnosis (NAS Web Station)

- **4.1 Prepare Check-file:** Copy inc/install_check_en.php to the root folder (tCash/).
- **4.2 PHP Profile (NAS):** Go to Web Station → Web Service Portal. Ensure your tCash folder is assigned a PHP 8.0 (or newer) profile.
- **4.3 Run Test:** Open your-site.com/tCash/install_check_en.php.

5. Cleanup & Operation

- **5.1 Delete Copy:** Remove install_check_en.php from the root folder.
-

DK Installationsvejledning (Dansk)

1. Database-fundament (NAS / Webhotel)

- **1.1 Opret database:** Opret en tom database (f.eks. tCash_db) i kontrolpanelet eller via MariaDB-pakken på din NAS.
- **1.2 Bruger & Adgang:** Opret en databasebruger og tildel **ALL PRIVILEGES**.
 - *NAS Tip:* Husk om din MariaDB kører på port 3306 eller 3307.
- **1.3 Import af struktur:** Åbn phpMyAdmin og importér din .sql fil for at oprette tabellerne.

2. Klargøring af ProgramMappe (tCash)

- **2.1 Upload:** Overfør mappen tCash til serveren.
- **2.2 Mappe-verificering:** Tjek at /uploads, /backups, /json-data og /temp_restore eksisterer.
- **2.3 NAS Rettigheder (File Station):**
 - Højreklik på mapperne i File Station $\rightarrow$ Egenskaber $\rightarrow$ Tilladelser.
 - Giv brugeren http (eller gruppen http) læse- og skriverettigheder.

3. Konfiguration af Handshake (inc-mappen)

- **3.1 Editering:** Åbn inc/db_connect.doc.php og indtast DB-data.
- **3.2 Aktivering:** Omdøb filen til inc/db_connect.inc.php.
- **3.3 Sikkerhed:** Omdøb inc/..htaccess til inc/.htaccess.

4. System-diagnose (NAS Web Station)

- **4.1 Klargør tjek-fil:** Kopiér inc/install_check_dk.php ud i rodmappen (tCash/).
- **4.2 PHP Profil (NAS):** Gå i Web Station $\rightarrow$ Web Service Portal. Sørg for at din tCash-mappe bruger en PHP 8.0 (eller nyere) profil.
- **4.3 Kør test:** Åbn din-side.dk/tCash/install_check_dk.php.

5. Oprydning & Drift

- **5.1 Slet arbejdskopi:** Fjern install_check_dk.php fra rodmappen.
-
